In case of luggage: Transport solutions from roof box to kayak rack.
So light, so good: Mattias Ekström talks about carbon add-on parts.
Audi stays Audi: Car care products from Audi Genuine Accessories.
Welcome

Do you want to experience more with your Audi, or make your day more comfortable, more adventurous, easier or even more efficient? At Audi Genuine Accessories, we focus on this every day. We endeavour to design our accessories to enrich your life in all kinds of ways. Our aim is to give you the scope to organise your time more effectively and to enjoy personal freedom on an entirely new level. Whether you go skiing in the mountains, cycling in the city or take your family to the seaside: we know what really matters to you and your loved ones.

Our expertise is not just about making cars that are safe, efficient and progressive. It’s also about producing accessories that ensure you get the most out of your Audi.

To give you even more ideas for your Audi, this year’s Catalogue includes stirring stories, background information and useful tips for you. Learn how communication in the vehicle keeps on getting more intuitive, about that material that sends Mattias Ekström into raptures, a vintage car love affair, and much more.

But now... enjoy reading!

06 Transport
Whether your plans are on a large or small scale, here you will find suitable transport solutions for your Audi, giving you all the space you need to do the job.

18 Sport and Design
An expression of your personality in every last detail. To ensure that your Audi is just as individual as you are, we have the necessary Audi Genuine Accessories in the Sport and Design chapter.

38 Communication
Always connected to the world. In the Communication chapter, you will find the right Audi Genuine Accessories for life on the move.

46 Fun Facts
Did you know...? We have been getting clued up to provide you with useful knowledge about your Audi and mobility.

48 Family
Safety for the little ones is our top priority. Here you will find all the products that make driving more convenient and comfortable for your children.

54 Comfort and Protection
Ensure your Audi always stays in the best condition in the future, you will find suitable Audi Genuine Accessories for correct vehicle care in the chapter on Comfort and Protection.
From the bustling city to a snow-topped hideaway – Audi Genuine Accessories has the best transport solutions to get you there. A snapshot from a totally different perspective.

**Ski and luggage boxes**
Available in high-gloss brilliant black and platinum-grey with side blade in brilliant black. Available in various sizes: 300 ltr., 360 ltr. (illustrated) and 405 ltr. Lockable. Can be opened on both sides. Quick attachment system. Can only be used in combination with roof carrier unit (available separately).

Whatever you want to do – transport solutions from Audi Genuine Accessories help you to put your plans into practice.
Kayak rack
For single-person kayaks up to 45 kg. Tiltable.
Kayak rack and retaining straps can be locked separately.
Can only be used in combination with roof carrier unit (available separately).

Maybe it's the next drive to the countryside, the coast or in the snow – possibly not far away. But far enough to take time out from everyday life. To see things from a different perspective. And rediscover a myriad of possibilities. For numerous different adventures and a large slice of spontaneity, Audi Genuine Accessories has developed transport equipment that is as flexible as you are.
The versatile roof carrier unit from Audi Genuine Accessories is a good starting point when deciding what luggage to take with you and how to transport it. It’s an ideal base for a large number of roof rack modules, such as the kayak rack, bicycle rack, roof box and the ski and snowboard rack. The durable mechanical equipment is produced using high-quality materials and features an anti-theft locking system. The attachment of the roof modules from Audi Genuine Accessories is not only secure, but also fast and convenient. It’s simple: attach and drive.
Racks up the miles with ease

Passionate cyclists like to have their bikes on-board with a bicycle rack from Audi Genuine Accessories. But what do they do when their bikes have to stay at home?

Bicycle rack
Anodised aluminium profile. Designed for rack and ruy bike attachment. Lockable. Max. carrying load: 17 kg. Can only be used in combination with roof carrier unit (available separately).
1. Choosing your materials
The bike holder consists of 5 separate parts which you can have cut to size at your local DIY store. You can choose the type of wood yourself. In our example it is high-quality bamboo.

2. The right tools
In addition to wood glue and sandpaper, you need a few tools, including a biscuit joiner and a circular saw and jigsaw, which you should be able to rent from a DIY store.

3. Carrying out the work
You need approx. 1 hour for assembly and approx. 1 hour to allow the glue to dry. DIY skills are an advantage.

For this, we have thought of something special. Together with Björn, a master carpenter from Hamburg, we will show you an easy way to build a stylish bike holder for your living room. In our DIY video tutorial, Björn explains which materials are suitable and everything else you need for the job. For even more utility, Björn has even thought of a way to allow you to attach your keys and helmet to the bike holder. Once done, your bike always has the perfect place, both at home and on your Audi. Have fun with your DIY project!

For more ideas and inspiration, visit our DIY hub at www.audi.com/DIY. Find Björn’s DIY guide, along with further tips and advice, in our video tutorial at www.audi.com/DIY (connection costs depend on your mobile phone contract).

The centrepiece:
Thanks to the prominent placement, the bike is a real eye-catcher – in any living room.

Bicycle carrier for towing bracket
Keep a tight grip on your next adventure

Skiing, kayaking, biking – no matter which hobby thrills you the most, with transport solutions from Audi Genuine Accessories your equipment always arrives safely at your destination.

01 Ski and luggage boxes
Available in either platinum grey (with side blade in brilliant black) or high-gloss brilliant black. Available in various sizes: 300 ltr., 360 ltr. and 405 ltr. Lockable. Can be opened on both sides. Quick attachment system. Can only be used in combination with roof carrier unit (available separately).

02 Roof box bags
Waterproof base. 5 cm high, waterproof surround. Various combinations possible. Available in three sizes: S (43 ltr.), M (76 ltr.) and L (82 ltr.).

03 Roof carrier bag
Specially designed for storage and transport of the roof carrier unit (available separately). High-quality fabric in anthracite with robust zip fastener. Carrying grip and practical hanging loops facilitate transport and storage. With side pocket for small parts.

04 Roof carrier unit
For various roof modules. Printed with Audi logo. Anodised aluminium profile. Anti-theft screw attachment.
PERSONALITY

A class of its own

Configure the personality of your Audi.

To understand Mattias Ekström and his fascination for motor sport, you have to go right back to the beginning – back to his childhood. This is the story of his passion for racing, true carbon enthusiasm and special childhood moments.
Mattias Ekström

Swedish racing driver from the rallycross racing team EKS Audi Sport, which receives works support from Audi. DTM touring car driver for Audi from 2001 to 2017, most recently for the Audi Sport Team ABT Sportsline.

It’s a picture of Sweden with endless plains, miles of forest paths and an atmosphere of tranquility that Mattias Ekström’s words paint in this interview. A place where he could enjoy many liberties and test the limits at an early age. He sees his home as the foundation for his later enthusiasm for speed and his passion for fast cars.

But if you thought this was all down to the influence of his father and former rallycross driver Bengt Ekström, you’d be wrong. Mattias honed his own skills. Even before he had a driving licence. At the age of eleven, together with his neighbour and cousin, he was already putting an old car through its paces in the field next door. Relating these anecdotes brings a light to his eyes. And a smile at the corners of his mouth.

Looking back, he knows that moments like this were only possible because his parents gave him the freedom to try things out. Not only is he infinitely grateful to them for that, he also knows that they helped him develop a pretty fine sense for gauging situations – especially tight ones. True to the motto “champions aren’t born, they are made.”

“How true these words are – today Mattias Ekström is himself an extremely successful racing driver. In sixteen years with Audi at his side, a loyal partnership has emerged – a partnership rewarded by countless wins. Today, he drives rallycross for his own team, EKS Audi Sport, with Audi works support. This successful cooperation demonstrates Mattias’ devotion to motor sport. Beyond his passion and commitment, here is a charming Swede who is a truly genuine guy, in clear contradiction of the typical racing driver clichés. To Mattias, it’s not all about driving as fast as possible, but about being at one with the car. Developing a feel for the "machine", as he calls it. That is why he also raves about the material used in his racing machines, which are made mostly of carbon.

“For me, the best drivers in the world are rally drivers.”
As a racing professional, Mattias is always at the cutting edge when it comes to the technical development of new materials, and he has a deep understanding of the materials used in his racing cars. He knows what matters to him, where his preferences lie, and how to go about surpassing the limits again and again. In both his professional and private life you’ll find examples of his love of good design and carbon. To Mattias, pure woven carbon fibre and brushed stainless steel are the most beautiful materials in the world and just as important as a car’s colour as a statement of style. So, for a unique look when configuring a car, he says he has a strong bias towards carbon materials.

“In purely visual terms, carbon is one of the most beautiful types of design.”

It is this special fascination for motor sport that defines Mattias Ekstrøm and set him apart from the field in DTM. With boundless enthusiasm for motor sport, he has always called the status quo into question, in order to be ready for new challenges. From the material composition of his cars to his finely honed driving skills – Mattias is driven by an unrivalled passion. An outsider might call it quirky but we like it.

As light and easy as your personal style. Learn more about carbon add-on parts from your Audi Partner.

**Carbon add-on parts**  
Are you a carbon fan too? Accentuate your own individual style with carbon add-on parts from Audi Genuine Accessories.

---

**Exterior mirror housing in carbon¹**  
To accentuate the dynamic design in high-quality carbon.

**Rear lid spoiler in carbon¹**  
For a dynamic, top-quality rear design. A further enhancement to the excellent aerodynamics.

As stylish as you are

Your Audi is an expression of your own personality.
Sharpen up your appearance even more.
With sport and design products from Audi Genuine Accessories.

01 Audi rings film set
The Audi rings film set emphasises the brand appearance of your vehicle.

02 Footrest and pedal caps in stainless steel
The combination of brushed stainless steel and anti-slip rubber is a perfect mix of design and safety. The photo shows pedal caps and footrest for automatic vehicles.

03 Sport tailpipe trim
The sport tailpipe trim emphasises the dynamic character of your Audi. Chrome-finished stainless steel accentuates the vehicle’s style and elegance.

Design gecko in aluminium look
The high-quality design gecko in aluminium look is an attractive eye-catcher for the interior or any other metal surface. The gecko symbolises quattro four-wheel drive. The design figure can be placed virtually anywhere, e.g. on one of the air outlet grilles. With an integrated magnet, it can be attached to suitable metallic surfaces after removing the retaining clip.
Little gadgets with a big effect: it seems that we have never had this much personal freedom to get the most out of life – whatever we want to do. We followed a drone photographer, who gave us an insight into a world full of new perspectives and his own personal interpretation of freedom.
Personal freedom can mean a lot of things: to be flexible, mobile, completely unattached, frontier-free. We can explore different countries, change jobs, find people, switch perspectives, dive down low or climb up high.

We have long since digitalized our own personal freedom. For Ivan, a smartphone and tablet, etc. are indispensable parts of everyday life and essential for his biggest hobby. He loves it. And he loves his freedom.

Drone, smartphone, tablet and car go hand in hand when looking for new perspectives. Zooming out of or into urban life, depending on his mood.

"Drone images change your perspective completely. They can suddenly make your own neighbourhood seem new and unfamiliar," says Ivan with a laugh. "It is exciting to see the effect these images can have on people. Now, drones have been around for quite a while. But every time I just love to experience again the
Wireless charging cover

For wireless charging of Apple iPhone 5, 5s, SE, 6, 6s and 7 (shown in photo). The charging cover protects against scratches, impacts and dirt. Certified by Apple. Compatible with Qi charging stations such as the Audi phone box.

emotions that different perspectives can trigger. Sometimes problems suddenly seem small, and the hustle and bustle is far away. That can really set you free.”

Ivan enjoys climbing into his car, going with the flow and freezing the frame on life's moments. For his hobby, he needs everything to work smoothly. “It's often the little things that make life easier. It's great that it is now so easy to connect smartphones with vehicles. For instance, I can mirror addresses from Google Maps or access my apps on my on-board display. It's really helpful and practical that I can charge my smartphone or tablet while I'm driving - and wireless charging is even more convenient.”

And now it's already time for Ivan to continue his search for new perspectives. Far away and flying high.
Connected to life

Stay connected on the road: exclusive communication solutions from Audi Genuine Accessories help you make your day easier and more convenient.

01 Audi Entertainment mobile Tablet for front seat backrests. Can also be used outside the vehicle. For use with videos, photos, games and music. Premium entertainment with excellent image quality on a 10.1 inch touchscreen display. Multiple connection options. Wi-Fi capable. Requirement for installation in vehicle: Preparation for Rear Seat Entertainment.

Fun Facts

Did you know?

The highest mileage ever recorded on a car's odometer was 4,890,993 km. That’s roughly equivalent to driving around the world 120 times.

8 km

1–3 km of cabling is installed in an average mid-sized car today, and up to 8 km can even be required in a single luxury car.

8 minutes

The camping tent from Audi Genuine Accessories can be pitched in only 8 minutes. It takes between 20 and 30 minutes to pitch a comparable, conventional camping tent.

In Russia, driving in a dirty vehicle is punishable by a fine.

Since 2015, astronauts have been able to brew espresso in the ISS. Now, with the Espresso mobil, you can do the same in any Audi.

If you hold your Audi convenience key to your head, its range will be doubled because the human skull acts as an amplifier.

It is estimated that, with the full introduction of autonomous vehicles, over 90% of traffic accidents will be prevented.
For growing challenges

The safety of your little ones is a big priority as far as we are concerned – especially when it comes to child restraint systems. We spoke to Sylvia Tappe, from Audi Technical Development, about the comfort and safety of Audi Genuine child restraint systems.
Children are very close to our hearts in the technical development division. Our development team has a mission to make products which do not have to make compromises in safety and comfort. And there is a lot to consider. Apart from EU safety standards, such as i-SIZE, it is important to know the anatomy of children and to make their parents’ everyday lives a little bit easier. These are the challenges facing Sylvia Tappe from the technical development department at Audi Genuine Accessories, who is a mother herself. She and the specialist team know what is needed and have developed child seats to meet the growing challenges.

Mrs Tappe, do your maternal instincts influence your work?

Yes, a lot. Because I have a child of my own, I have been able to gather a lot of experience, and I like to channel this experience into the development of our child seats. For instance: how can a child sit comfortably, even when it is sleeping in the car? Safety always plays a major role, and I just want to achieve the best results I possibly can for all the children that use our seats.

Child seats are a highly emotional subject, because we are talking about the comfort and safety of babies and children. Safety is the most important question here. Which questions are frequently asked by parents?

As you know, each child grows at a different rate. So, children in a certain age range have completely different statures which all have to receive the same high level of protection. The modification of the Directive will make it easier for parents to use the right child seat at the right time. A tip: if the child’s head protrudes above the top edge of the child seat, it is time to change to the next larger child seat, regardless of how old the child is or how much it weighs.

In your opinion, why should a customer choose an Audi child seat?

Buying an Audi means buying quality. And the same applies to our accessories. We attach top priority to the safety of our products and go beyond the statutory requirements and tests. We carry out additional crash tests, work with independent test institutes and subject the child seats to durability tests before they reach our customers. The very high standards that we specify are geared to providing our child seats with the highest level of safety and comfort and meeting all the growing challenges.

Finally, what tips would you give to parents?

You children should always sit in a child seat, no matter how short the journey. Think twice before buying a used child seat, because you don’t know its history. Even a small collision or incorrect handling by the previous owner can mean that a child seat no longer meets the minimum safety requirements. After all, the safety of our little ones should always take top priority.

I wish all parents and children a pleasant and safe journey.

Sylvia Tappe

Employed by Audi for the last 24 years and responsible for the technical development of child seats at Audi Genuine Accessories since 2015.

Previously, child seats were chosen according to weight and age; with newer models it’s just according to a child’s size. Why has this changed?

As you know, each child grows at a different rate. So, children in a certain age range have completely different statures which all have to receive the same high level of protection. The modification of the Directive will make it easier for parents to use the right child seat at the right time. A classic love affair

Some places witness the birth of ideas for our future, others guard the treasures of the past. Gerhard Hochhuber’s garage houses three of these treasures. He tells us his story of how to maintain value and care for valuable belongings, and of his passion for beautiful cars.
It’s seven o’clock in the morning and feels like 2 degrees Celsius. Immersed in thick fog, a garage lies situated between Ingolstadt and Munich: the sun has just risen. The village, with its population of 750, is still sound asleep.

Gerhard Hochhuber, on the other hand, is already hard at work in his garage.

Inside it is not much warmer – it is tidy and yet full of personal things: a shelf with spare parts and high-quality car care products, sponges and leather cloths next to nuts and bolts and all kinds of tools. On the inside of the garage door hang old number plates, awards, prizes and a garland from the good old Auto Union days. In the back part of the workshop – underneath grey tarpaulins – the silhouettes of three cars can be recognised.

Gerhard Hochhuber is a mountain of a man with a firm handshake, a proud fellow wearing four gold rings and a striking gold chain. He speaks in Bavarian dialect with a deep, warm voice:

“You can only pursue a hobby like this if your wife agrees.” He smiles. “And I’m glad to say that Ilse also loves our cars very much.”

Gerhard Hochhuber, 65, has a passion for vintage and antique cars. He has three gems from days gone by, three genuine ancestors of Audi. His garage is home to a DKW F7, a masterpiece from 1938, a Wanderer W23 built in 1938 and an Auto Union 1000 Sp Cabriolet from 1964. As the youngest of 15 children, his brothers infused him with enthusiasm for engines and machinery right from his earliest years. His father had a small carriage business. Whether on the fields, in the forest or later on the road – his passion for driving was handed down through the generations. As someone who found his calling late in life, he knows what it means to hold on to value and care for valuable belongings. “We live in the age of disposable products, which is why it is important to care for and maintain things – especially for our grandchildren.”

While still a child, he was already trying things out and tinkering with his brothers’ cars. Then he started a butcher’s apprenticeship and subsequently spent his working years on the road as a bus and truck driver. Now he is retired and is devoted to his vintage cars. “A love of driving – it’s in your genes. And when it’s in your genes, it’s there to stay.”

Hidden treasures
The garage is Gerhard Hochhuber’s second home.

“The moment I set my eyes on that car, my pulse was racing and I knew we would be taking it home with us.”

After long negotiations, Hochhuber finally loaded the DKW F7, which was in desolate condition, out of the barn where it was stored and onto a trailer to take it home. He has put hundreds of hours of painstaking work and skill into the restoration. Every day he has learnt something new.

Care products bag
Contains everything you need to achieve a clean finish after thorough cleaning. Consisting of insect remover, intensive plastic care solution, polymer wax polish, wax shampoo, glass polish, micro-fibre cloth, insect sponge and cleaning sponge.

Summer care products bag (shown) also contains wheel cleaner. Winter care products bag also contains active foam cleaner and anti-freeze. Also available as separate products.

Slow and steady wins the race
There is always a job to be done at the workbench.
And the relationship between driver and car becomes closer with every mile. “I talk to my cars, you know. When I am driving I might say: ‘Man were you good again today.’ Or, if we are driving up a mountain pass: ‘don’t let me down.’ That helps! But others just say I’m daft”, says Hochhuber and laughs.

The right care is vital to ensure that everything stays as it is. A thorough work-over is recommended after every trip to ensure that the quality and, in particular, the value of an antique car is preserved in the long term. This ensures that the leather remains supple and the paint doesn’t lose colour. “You really should work on it once a week”, is the expert’s advice when asked about the perfect care programme. The car is washed with a fine sponge and leathered down with a genuine deerskin leather cloth until the paint is dry. That’s followed by a coat of polish. “With an antique car you do everything by hand. No machines. Steer clear of aggressive materials. That’s important.” That takes time, but this passionate collector is happy to take the time. He exudes a calmness which is infectious. After all, he is maintaining his vehicles not just for himself, but for the next generation. In addition to a daughter and a son, Hochhuber has seven grandchildren and one great grandchild who he would like to take on his three gems. That way they stay in the family. “They are all interested – it’s just that none of them wants to maintain them yet”, he says with a grin.

Having a clean car means a lot to him, but not just with antique cars. Maintaining his everyday car is a regular ritual as well. “A car needs to be cared for. Even if it’s only for driving to the bakery”, says Hochhuber with a laugh.

The art of restoring and maintaining antiques
Gerhard Hochhuber’s antique cars are real treasures that he intends to maintain and pass down to his grandchildren.

something new and his love for his antique cars has grown stronger.

But when asked which his favourite is, he glows: “That’s definitely the 1000 Sp. My wife loves that car too.”

The red cabriolet in his garage regularly draws envious looks on Hochhuber’s European tours. Whether in Switzerland, Holland, or on a day trip to Munich – Gerhard and his wife love their outings in the red roadster. Wherever the journey may take them.

One of the most important facets of maintaining an antique car is driving it. “An antique car which just stands around will deteriorate. It is very important to keep these old cars moving. The more miles you drive them, the better they run.”

Perfect care
You can’t go wrong with gentle car care products.

Gerhard Hochhuber
A passionate collector with a big heart and an even bigger family.

Leather care set
The products in the set renew the protective film and protect leather and leatherette against wear and fading. Even worn and neglected leather will be refreshed and supple again.

Contents: cleaner for leather and leatherette, care cream, sponge, fleece cloth.
Home is where you are

Feel at home, even when you are on the road, with comfort and protection solutions from Audi Genuine Accessories. With a well-maintained Audi which keeps you comfortable throughout the day, with all the important things you need on-board.

01 Espresso mobile for use with coffee capsules
Genuine creamy espresso enjoyment. The set contains: an elegant storage bag with two break-proof cups, a microfibre cloth and a waste container for coffee capsules. Compatible with all Nespresso capsules (not included). Connection via the cigarette lighter. Pressure: 19 bar.

02 Coat hanger
Blends in with the vehicle interior, is easy and quick to attach to the head restraint and carries your items of clothing safely and freely suspended.

03 Gecko air freshener
 Releases a pleasant scent in the vehicle. Attaches to the air outlet. No risk of leakage, as it does not contain any liquids.

04 Sun protection system
Made to match. Offers virtually complete sun protection. Easy to fit.

05 Luggage compartment tray
Protects the luggage compartment floor against dirt. With surrounding edge and non-slip pattern.

06 All-weather floor mats
Durable. Easy to clean. Protect against moisture and heavy soiling. Made from 100% recyclable plastic. Secured to the dedicated fastening points.

Rear seat protective cover and safety harness for dogs
The cover protects the rear seats, side panels and rear doors of your Audi against dirt. It is equipped with lockable slots for seat belts, allowing the use of the safety harness for dogs. The safety harness allows your dog to be transported safely and comfortably. Available in four sizes.

General legal information

Please contact your Audi Partner for information on which products are suitable for your model, which restrictions apply, the amount of time required for installation and how much it costs. Subject to change without notice.

It is not possible to order a particular tyre. Please ask your Audi Partner which tyres are available in your country.

Information regarding wheels:
Aluminium wheels with a machine-polished or milled finish, and polished or partly polished aluminium wheels must not be used in the event of wintry road conditions. Due to the manufacturing process, the rim surfaces do not possess sufficient anti-corrosion protection and are at risk of long-term damage due to road salt or similar materials. Please note that not all cast aluminium wheels are available as optional equipment ex works; some are only available as a retrofit solution from your Audi Partner.

Classification of tyre parameters

The table shows the class ratings for fuel efficiency, wet grip and external rolling noise for different tyre sizes.
